

Mansard Capital Management in conjunction with KMI Consultants have created three bespoke risk rated model portfolios available exclusively to KMI's clients. Each risk rated portfolio will hold a range of asset classes to maintain diversification, taking advantage of market opportunities and ensure they are not directly correlated to equity or bond markets.

### Manager Commentary

Regional equities took contrasting paths in March. US equities closed the month flat, with the S&P 500 Index gaining 0.12% amid increased scepticism of US President Donald Trump's ability to implement his economic agenda.

European equity markets had their strongest month this year, consolidating a good first quarter of 2017. The Eurostoxx 50 Index increased 5.72% in March, as the results of the Dutch elections eased the concerns of political risk. The German DAX Index returned 4.04%, while UK equities also had a positive month, with the FTSE 100 Index gaining 1.12% despite the triggering of Article 50 on March 29<sup>th</sup>. UK REITs turned back to their negative trend, with the FTSE NAREIT UK REITs Index losing -1.57% in the month.

The MSCI AC Asia Pacific ex Japan Index reported a gain of 3.08%, the third consecutive month in which the index reported returns above 3%, consolidating the positive period for the region. However, the Nikkei Index in Japan reported a loss of -0.47% in March, mostly due to the appreciation of the Yen against the Dollar, which may reflect in lower export levels.

Emerging markets consolidated their strong start to the year. The MSCI Emerging Markets Index reported a gain of 1.96% in March, their fourth consecutive positive month. The Shanghai Composite Index in China detracted -0.57%, with companies still facing liquidity issues despite the intervention of the People's Bank of China.

Fixed Income markets had a volatile month. The US Treasury yield closed the month unchanged at 2.39%, spiking above 2.60% around the Federal Reserve announcement that increased the base rate to 1%. The German Bund yield showed a similar path, hitting 0.50% on the 14<sup>th</sup> March and closing at 0.33%, increasing 0.12%. The UK Gilts yield moved on a positive trajectory, reaching 1.30% in the second half of the month before closing the month at 1.14%, 0.01% lower than February.

The US Dollar weakened in relation to all the major currencies in March. The Euro appreciated 0.72% against the US Dollar, Sterling appreciated 1.37%. The Yen appreciated 1.23%, ending March at 111.39, close to its value before the US elections. Our currency strategies contributed 0.04%.

### Top 5 Fund Holdings

Principal Asset Allocation:	<b>50.0%</b>
